Aegis of Norrath is a community-driven server currently in the Planes of Power expansion (3/2025), where we strive to preserve a classic(ish) experience while also adding quality-of-life features from later expansions. Our dedicated team aims to create a fun and nostalgic journey through EverQuest's classic and progression eras.

While MQ2 and multiboxing are allowed, cheating in any form, including warping, instant camping, or hacks, will not be tolerated. Let's foster kindness and relish in the nostalgia together! Join us on Discord to be a part of our community.

East Commonland's Tunnel is the Original Hub zone. Buffs do not fade while in EC. Perfect newbie location! Since launching PoP and Planes of Knowledge, PoK has become the new Hub. Our original EC is still intact.

Translocators outside of every city offering ports back to ECTunnel.
